## MEMORANDUM FOR THE RECORD

SUBJECT: Electrostatic Hold-down Device

On 12 July 1967 [ ] of the Development Staff brought a Richards light table to the Exploratory Development Laboratory for examination. The light table had been modified to accommodate an electrostatic hold-down device and it was felt that the modification seriously reduced the light level. The work had been performed by [ ] asked to speak to the person handling the Data Corporation contract and asked him if he would disassemble the light table and ascertain which component in the hold down modification was attenuating the illumination. [ ] suggested that [ ] first contact [ ] before attempting any further investigations.

[ ] who monitored tasks 1,2, and 3 of the aforementioned contract [ ] felt that in seeking him out to look at the equipment, it was apparent that someone was under the impression that he monitored the task. For the sake of preventing any further obfuscations, it is thus necessary to delineate [ ] role in Task #4, the modification of the Richards light table.

In April 1967, [ ] of the Development Staff asked if we had a contract under which some work could be done to modify a Richards light table to accommodate an electrostatic hold-down device. [ ] that we had a T&M contract with [ ] that might as yet have sufficient funds for the project. At [ ] request, [ ] and obtained an up to the minute report on the funds left in the contract. [ ] gave this figure to [ ] Other than this, [ ] had nothing further to do with the project. All subsequent decisions and actions were taken without consulting or even notifying [ ] and at no time was his counsel or opinions sought. [ ] knowledge of the project has come solely from reports from [ ] which routinely included status reports on the light table modification along with reports on the tasks [ ] was monitoring. [ ] saw the equipment for the first time on 12 July 1967.
